Profile Summary

A motivated software developer with a problem-solving mindset and a strong interest in understanding how systems work. Values continuous learning, thoughtful problem-solving, and writing clean, maintainable code. Enjoys exploring new ideas, building practical solutions, and improving through hands-on experience.

Education

- **Graphic Era Hill University** — Haldwani, Uttarakhand
  Bachelor of Computer Applications — *Aug. 2024 – May 2027*
- **Saraswati Academy** — Haldwani, Uttarakhand
  Senior Secondary – 75% *Secondary – 90%* — *2021 – 2023*

Projects

- **DevLens** — *Live* | *Code*

  AI-powered developer analytics and career-fit platform built with the MERN stack, combining GitHub insights with resume analysis.

  Key features:

  - Analyzes GitHub activity, repository quality, and language distribution, generating a profile score out of 100
  - Generates downloadable PNG cards showcasing GitHub statistics
  - Evaluates role-specific suitability using GitHub data and uploaded PDF resumes, with a score out of 100
  - Recommends skills to learn and projects to build based on identified skill gaps
  - Implements daily caching to reduce redundant LLM analysis and improve response times

  Tech → MongoDB | Express.js | React.js | Node.js | GitHub REST API | LLM Integration

- **Reclaim** — *Live* | *Code*

  Full-stack MERN platform that helps users recover lost items through AI-powered image analysis, attribute-based matching, and mutual confirmation.

  Key features:

  - Extracts item characteristics, including color and distinctive properties, from uploaded images using Gemini AI and Multer
  - Matches extracted attributes against reported lost items to identify potential matches
  - Notifies both parties via email using Nodemailer when a potential match is detected
  - Implements link-based mutual confirmation, sharing contact details only after both parties agree

  Streamlines lost-item recovery through AI-assisted matching and consent-based contact exchange.

  Tech → MongoDB | Express.js | React.js | Node.js | Multer | Gemini AI | Nodemailer

Technical Skills

- **Languages**: C | C++ | JavaScript (ES6+) | SQL
- **Frontend**: HTML5 | CSS3 | React.js | Tailwind CSS
- **Backend**: Node.js | Express.js | MongoDB | REST APIs
- **Developer Tools**: Git | GitHub | Linux | Postman
- **Core Concepts**: Data Structures and Algorithms | Object-Oriented Programming | DBMS | Operating Systems
