Profile Summary

Full-stack developer with hands-on experience building web applications using the MERN stack. Strong foundation in JavaScript, C++, data structures, algorithms, databases, and REST APIs. Focused on developing scalable software solutions, writing clean maintainable code, and continuously growing as a software engineer.

Education

- **Graphic Era Hill University** Haldwani, Uttarakhand
  Bachelor of Computer Applications (BCA) *Aug. 2024 – May 2027*
- **Saraswati Academy** Haldwani, Uttarakhand
  Senior Secondary – 75% *Secondary – 90%* *2021 – 2023*

Projects

- **DevLens** *Live* | *Code*

  Developer analytics platform analyzing GitHub profiles via repository metadata and API insights.

  Delivers structured analysis of:

  - Coding activity patterns
  - Repository quality signals
  - Language distribution
  - Contribution consistency

  Helps developers understand and improve their public engineering presence.

  Tech → HTML | CSS | JavaScript | GitHub REST API | LLM Integration | Node.js | Express.js

- **Lost & Found Management System** *Code*

  Full-stack MERN platform connecting people who lost items with those who found them via AI-assisted matching and automated email notifications.

  Two modules:

  - *Lost* – Submits a text description; stores the report and emails a confirmation to the user
  - *Found* – Uploads a photo processed via Multer and Gemini AI for property extraction, then matches it against the Lost collection and emails both parties' contacts on a match

  Bridges loss and recovery through computer vision, AI, and automated communication.

  Tech → MongoDB | Express.js | React.js | Node.js | Multer | Gemini AI | Nodemailer

Technical Skills

- **Languages**: C | C++ | JavaScript (ES6+) | SQL
- **Frontend**: HTML5 | CSS3 | React.js | Responsive Web Design | DOM Manipulation | REST API Integration
- **Backend**: Node.js | Express.js | RESTful API Design | MongoDB
- **Dev Tools**: Git | GitHub | Linux | Postman
- **Core Concepts**: OOP | DSA | Operating Systems | DBMS | Problem Solving
- **Currently Learning**: System Design | TypeScript | Next.js | Docker | Advanced SQL | AI/ML Integration
